

# HDD 5 STAGE WASH SYSTEM

**HDD**  
HIGH DEFINITION DETAIL

## WHEELS

Add 20ml (1 cap full) of Nanolicious Wash to your Wheel bucket & half fill with water. Spray Wheely Clean onto all 4 wheels (or 2 at a time). Allow to dwell for 1-2mins. Pressure Rinse all wheels.

## TYRES

Dry wheels/tyres with a cloth dedicated to wheels only. After drying wheels and tyres, spray Tyre Sheen onto your yellow applicator. Apply evenly to tyre surface. Leave to dry for 5mins.

## SNOW COMBO

Fill Foam Cannon with water to the water level line (900mL). Add 80-100mL of Snow Foam to Cannon. Cover car completely (half of cannon mixture) & allow to dwell for 3-5 minutes while you clean the wheels with your wheel bucket & cloth. Pressure rinse off. Foam car again with remainder of Snow Foam.

## WASHING

Fill RINSE Bucket (with Gritguard insert) with fresh, clean water. Wash car from top, down, using straight motions (no circles). Rinse Wash Pad/Mitt after each panel/section in Rinse Bucket. Leave the dirtiest areas (lower doors & rear end) until last. Pressure Rinse car ensuring all soaps are removed.

## DRYING

Spray Drying Towel with Boss Gloss (4-5 sprays each side). Dry glass areas first. Lightly mist each panel/section and dry in straight lines (no circles) & be gentle. Wring towel out if you are leaving water streaks. Do not use this drying towel on wheels!

\*A pressure washer MUST be used for the HDD 5 Stage Wash Procedure. Always read the labels/directions of the products prior to use. Only wash your car in the shade, early morning or late evening and ensure your car is cool to touch prior to washing.
